Subject: Re: URGENT - NHTSA to Upgrade ES350 Floor Mat Investigation.

Folks:

As a follow up to yesterday's email on this subject, I received an unofficial copy of the upgrade resume for our information only (attached).

I was also told to expect that this would be released on NHTSA's website potentially as early at 8/11 (Saturday).

Best Regards,  
Chris

Subject URGENT - NHTSA to Upgrade ES350 Floor Mat Investigation

FYI - I just received a "heads up" call from NHTSA regarding the agency's intention to upgrade the Preliminary investigation (PE07-016) into the Lexus ES350 All Weather Floor Mats to an Engineering Analysis (EA).

After reviewing Toyota's submission of June 11, as well as its own independent testing and field evaluation of incidents, the agency believes that it should upgrade based on the severity of the incidents (i.e. some high-speed, wide-open-throttle complaints), coupled with its latest count of 40 complaints, 8 crashes and 12 injuries.

Although NHTSA recognizes the efforts we have already made to alert dealers and owners of the potential

interference issue (when the mats are incorrectly stacked), NHTSA also believes the design of the floor mat itself (weight, cut, fit) lends itself to causing unintended pedal application even when the mat is not stacked. In further conversation, although the agency can not legally 'prescribe' a fix, they felt that slightly modifying the existing mat may help alleviate the problem.

I expressed our appreciation for the heads up, as well as encouraged future close dialogue to attempt to come to a mutually acceptable solution.

We will forward the resume as soon as it becomes available, and at that time we will also try to find out when this is likely to become public, to gauge timing constraints for Q&A preparation.

Best Regards,  
Chris
